Elsevier

Title Index

Analytic hierarchy approach to activity-based costing, An, 151
Applications of O.R. techniques in cost allocation of major operational materials in an alloy and special steel manufacturing unit, 189

Bicriterion design of process control charts, 141

Coordinating new product development and delivery, 53

Demand forecasting for a jewelry packaging company: pattern identification and assessment, 203
Determining gathering belt capacities for bulk conveyor networks with multiple discrete loading sources, 81

Economic evaluation of leadtime reduction, 111
Engineering foundation of production microeconomics – applications to examples concerning the chemical processing industries, 163
Expert systems and production/operations management, 249

Framework for quality system design in "one of a kind" manufacturing companies, A, 121

Interactive production planning and scheduling system for a flow-type manufacturing process, An, 43

Koopmans activity analysis as an optimal control problem, 95

Learning by doing and optimal factor demand, 67

Minimizing the makespan of a group scheduling problem: a new heuristic, 217
Modelling of condition based maintenance at the coal face, 1
Multiple ARC network model of production planning in a steel mill, A, 195

Optimal constant due-date determination and sequencing of *n* jobs on a single machine, 259
Optimal investment and inventory policy, An, 211
Optimization of guillotine shearing operations, 59
Optimizing the location of material transfer stations without layout analysis, 169
Optimum number of kanbans between two adjacent workstations in a JIT system, 179

Review of multi-criterion approaches to FMS scheduling problems, A, 13

Simulation model for warranty analysis, A, 131
Single machine scheduling with controllable processing times: a parametric study, 105
Smoothing supply chain dynamics, 231
Statistical Process Control: An examination of some common queries, 33
